

Chapter 10

Invoice Templates

T.O.M. comes with a predefined Invoice template that you can print by simply selecting them from a list. Invoice templates allow you to customize your own invoices to suit your individual needs. In addition, you can create your own Invoice templates and choose the information you want printed on the invoice. T.O.M. makes it easy to create Invoice templates by simply checking and unchecking print options and entering custom titles to be printed on the invoice. You can also edit existing templates as necessary and delete templates you no longer need.

To access the various Invoice templates routines open the File menu, then click Other (Figure 10-1). Click Templates and then Invoice Templates. The Invoice Templates List screen (Figure 10-2) will be displayed.

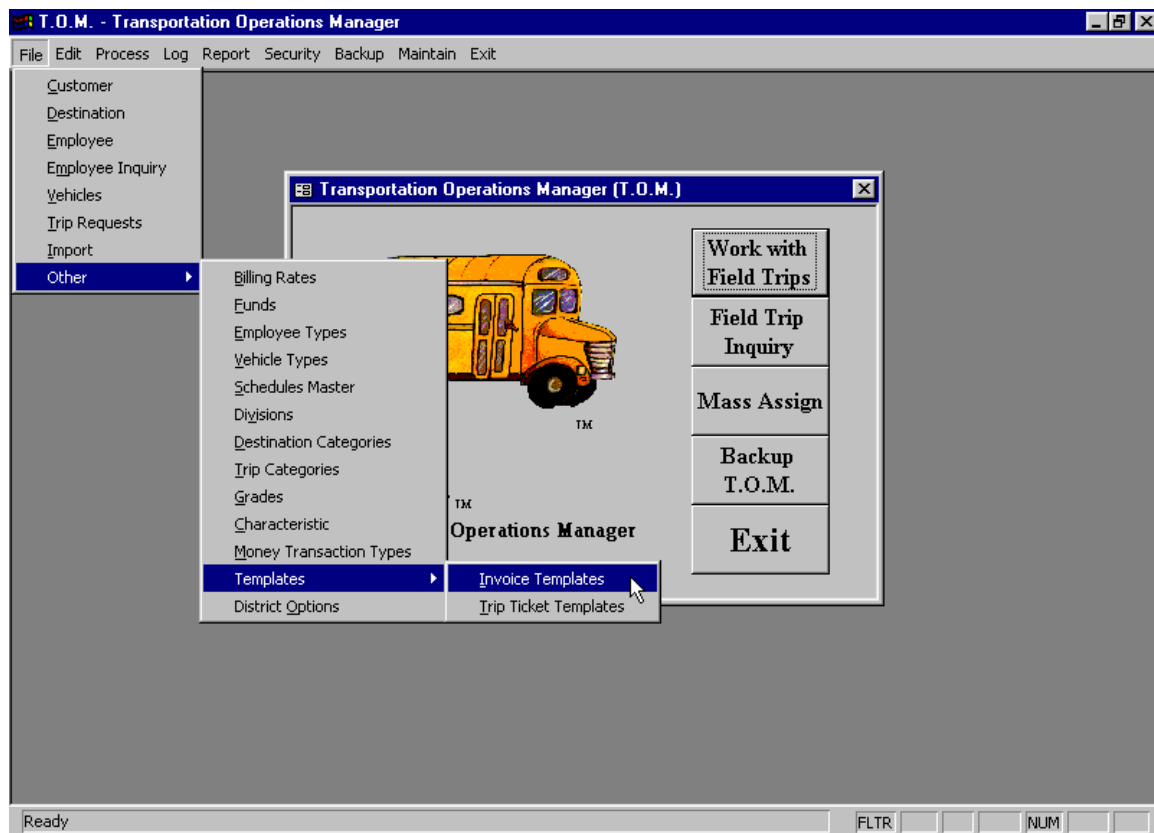

Figure 10-1. Accessing Invoice Templates on T.O.M.'s Main Screen

The Invoice Templates screen (Figure 10-2) allows you to add, change and remove items in the list. Figure 10-2 gives a brief explanation of the various function buttons offered to you when you maintain an Invoice Templates list file.

Working with Invoice Templates

Invoice templates are used to print your invoices in the format you define and with the print options you select. You may create an unlimited number of Invoice templates.

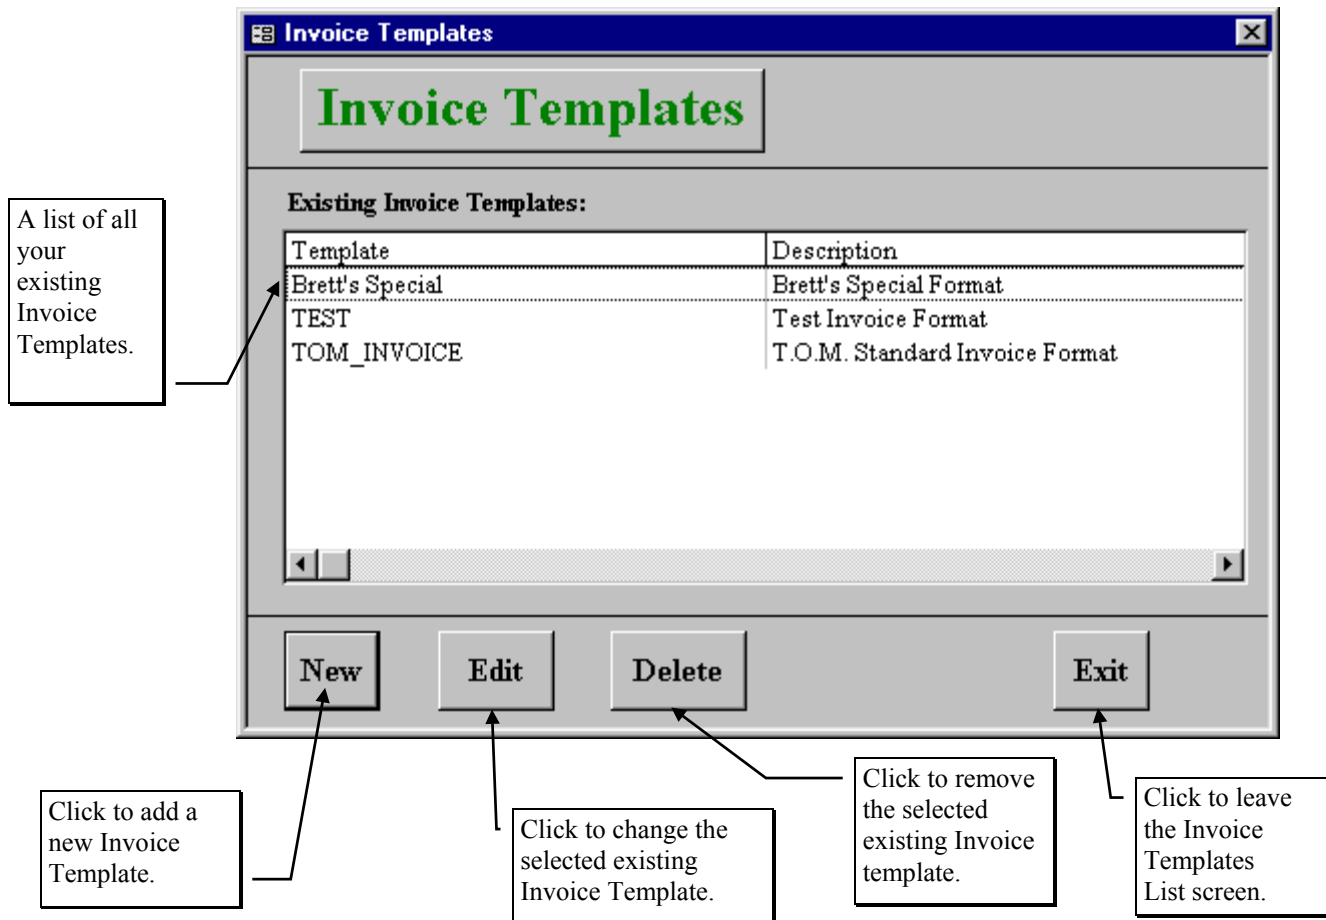

Figure 10-2. The Invoice Templates List Screen

Figure 10-2 shows the Invoice Templates List screen, which lists all of the Invoice templates that you have set up with T.O.M. From this screen you tell T.O.M. if you want to add a new invoice template, change an existing invoice template or delete an existing invoice template.

Adding a New Invoice Template

If you wish to add a new invoice template click the New button and you will be taken to the Invoice Templates Data Entry screen (Figure 10-3, Figure 10-4, Figure 10-5, Figure 10-6 and Figure 10-7). This screen will let you define the print options and titles for your invoice template. To save the invoice template information you have entered click the OK button. To exit this screen without saving the information you have entered click the Exit button. See *Invoice Templates Data Entry Screen Options* below for a complete description of print selections and title fields.

NOTE: You can see examples of the invoices created with T.O.M. at the end of this chapter Figure 10. 8 and Figure 10. 9.

Changing an Existing Invoice Template

If you wish to change an existing invoice template, then select a invoice template on the Invoice Templates List screen (Figure 10-2) by clicking the row containing the desired invoice template and then click the Edit button. You will be taken to the Invoice Templates Data Entry screen (Figure 10-3, Figure 10-4, Figure 10-5, Figure 10-6 and Figure 10-7), which will let you change any of the invoice template print options and titles. To save the invoice template information you have changed, click the OK button. To exit this screen without saving the information you have entered click the Exit button. See *Invoice Templates Data Entry Screen Options* below for a complete description of print selections and title fields.

Deleting an Existing Invoice Template

To remove an existing invoice template, then select a invoice template on the Invoice Templates List screen (Figure 10-2) by clicking the row containing the desired invoice template and then click the Delete button. T.O.M. will ask you to confirm that you really want to delete this invoice template. If you do confirm to T.O.M. that you want to delete the invoice template, T.O.M. will remove the invoice template from your T.O.M. database.

Invoice Templates Data Entry Screen Options

The Invoice Templates screen uses five tabs to help you select your print options and enter titles for different sections on the invoice, as well as a tear sheet section.
