Acknowledgments

Gecko Microsolutions would like to thank everyone who contributed to make Transportation Operations Manager (T.O.M.) a reality. Thanks go to all of our beta testers for their diligence and feedback.

Special thanks and recognition go to **Dr. Skip Brown** and **Kathy Bonke** of Paradise Valley Unified School District. Skip is the father of T.O.M.. For many years T.O.M. was nothing more than a twinkle in Skip's eyes. It was Skip that asked (some say demanded) "Why can't a computer do this?". Skip suffered through endless meetings and flowcharts with programmers to bring the concept of automatic assignment of field trips into a realistic formula. Thanks to Skip's imagination and perseverance this baby called T.O.M. has come into the world.

Kathy Bonke spent many a long meeting with programmers to develop the design of T.O.M.. Kathy also was the brave soul that tested every feature of the T.O.M. software for the first time while she was trying to take care of all of her field trips. Kathy checked by hand every field trip assignment, canceled trip, passed driver, driver refusal and field trip billing performed by T.O.M. for over 2 years. Thanks to the endless hours of work, testing and double checking by Kathy you can be sure that T.O.M. WORKS!

Thanks also go to the spouses and families of Gecko Microsolutions employees. They endured many a night and weekend alone while T.O.M. was being created. Without their understanding or support T.O.M. would have never become more than just a dream.

Finally, Gecko wishes to thank all of our customers who have shown enough confidence in T.O.M. to buy it and who have worked with Gecko to make it become the most powerful transportation software available!

Welcome to Transportation Operations Manager (T.O.M.)

Thank you for selecting Transportation Operations Manager (T.O.M.). T.O.M. was created by Gecko Microsolutions, a software firm specializing in the development of software products for school transportation operations.

I know that you will soon be taking advantage of the easy and powerful features of your T.O.M. software. As you know, T.O.M. was designed by school transportation officials not by computer programmers. As such, you will find T.O.M. more robust in useful features than other transportation programs. Features like automatic assignment of drivers and vehicles to field trips, automatic calculation of field trips estimates and truly useful management reports could only be the product of people who do the same job as you.

Now that you have invested in T.O.M. Gecko would like to extend to you the same invitation that we extend to all of our customers. Please tell us how T.O.M. can improve. Any excellent software product is never really finished. It is constantly evolving. So it is with T.O.M.. Gecko is always listening to its customers on ways to make T.O.M. an even more powerful product.!

Once again, thank you for purchasing T.O.M.. We hope that it helps you do your job better and make your life easier. If you have any problems or questions please don't hesitate to contact us.
