Transportation Operations Manager (T.O.M.) Field Trip Administration Software
User ID – Import Notes

The Transportation Operations Manager (T.O.M.) Field Trip Administration Software uses application based security rather than a Windows based operating system security. The userid's and profile information are stored in a MS Database. As such the user profiles can be imported into this database. Below is the detailed T.O.M. security database layout information. NOTE: the Yes/No fields are Boolean fields so the value for True or Yes = -1 and the value for False or No = 0.
